

WK 260 SE

The Test System **WK 260 SE** offers optimized cable testing with the essential features needed for top performance. Delivering the highest quality with enhanced accessibility for all users, it's designed for ease of use with no compromises in reliability.

Highlights

- Start testing immediately with the **IVISion Studio SE Light** Software for a user-friendly experience
- Upgrade to **IVISion Studio SE** for a full range of functionalities and enhanced capabilities
- Conveniently integrate the testing process into your production environment with **versatile communication options** from field level to enterprise level
- Experience **superior flexibility** and **clear visual guidance** with our computer-based system, delivering more intuitive operation than traditional stand-alone solutions
- Equipped with robust test point cards to ensure **continuous uptime** and **exceptional performance**

Areas of application:

- Automotive
- Agritech
- Construction Machinery
- Home Appliances
- Cranes
- Control Cabinets
- Factory Automation

www.weetech.de

Technical Specifications:

Hardware

- Continuity Test down to 1 Ohm
- Short Test up to 100 kOhm
- Resistor Test 1 Ohm – 100 kOhm
- Capacitance Test 10 nF – 1,000 µF
- Test of clips, diodes, zener diodes, switches and connector detections
- Illuminate fixture LEDs on test tables
- Programmable voltage 0 – 20 Vdc
- Programmable current levels from 100 µA to 100 mA
- Remote Interface
- Up to 256 Test Points

Software

- Failure Visualization (mark affected cavities on connector picture)
- Guided Assembly
- Live System Monitoring
- Database Link for Test Results
- User Management
- Excel to Test Program Converter
- Miswire Check
- Batch Production
